

THE NEED FOR

Supply Chain Visibility

What is Visibility?

Full insight into all areas of your supply chain management operations. Sales activities, orders, inventory, and more are visible and able to be monitored to anticipate issues and enable success.

63%

of companies with global supply chains indicated visibility as a **high priority**.

33%

indicated it was a **medium priority**.

There is an increasing need for visibility into all areas of a company's supply chain.

Top 3 Actions for Supply Chains:

Improve visibility across all departments & integration into supply chain.

44%

Optimize processes to increase ease of monitoring, usability, and or efficiency.

40%

Better timelines and accuracy in supply chain transactions.

26%

Top Companies are 2.3 times more likely to have online visibility into supply chain disruptions.

How can you accomplish maximum visibility?
